## Compaction Products

# Stationary Compactors

## Model-245 HD WQ Stationary

## Model-345 HD WQ with Rear Feed Security Chute

One of several options which can be added to any of our stationary units to customize every installation and service the personal needs of our customer.

## 8 Cubic Yard Transfer Packer

Our transfer compactors are built to withstand the everyday beating associated with the typical transfer site. Our ability to custom engineer and manufacture a complete system in various sizes and customer requirements makes Wastequip the name to know for transfer.

*10 Yard Transfer Packing into Trailer*

# Self Contained Compactors

## Model 365-X WQ Self Contained

For special handling requirements, Wastequip offers a complete line of compactors designed for liquid retention. Our roll-off self contained compactors come in many different capacities with the ability to handle more material as seen with our model 365X WQ. The 365X WQ has the largest clear top opening in the industry. (60" x 72") ▶

## Front Load Vertical Compactor

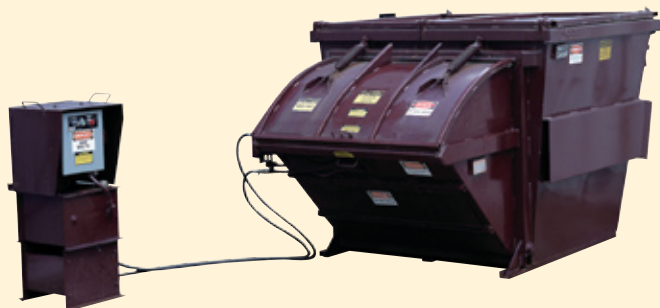

An economical alternative to more costly roll-off self contained compactors, this front load self contained unit is typically used for smaller commercial accounts. The standard 4, 6, and 8 cubic yard compactors can be integrated to work in cooperation with current front load routes. It can be ground fed, dock fed, or chute fed based on the customer's needs.

## Model 265-XWQ with Hydraulic Lid

## Front Load PM6FS Pack-Man

- Ideal for fast food restaurants, nursing homes and other smaller volume locations requiring secure, leak resistant waste handling
- Interlocking fill door provides safe and tamper-resistant operation
- Compatible with most front-load waste handling trucks
- 6 cubic yard capacity

## Heavy-Duty Door Seal on all Wastequip Roll-Off Self Contained Compactors

Fully gasketed rear door system with adjustable latches and hinges helps prevent leakage and odor problems.

# Pre-Crusher Compactors

## Model 645 XHD WQ - Pre-Crusher

Our pre-crushing compactors are made for compacting large bulky items. Material is placed into the charge box and then crushed up against a heavy duty reinforced steel bulkhead before entering the compaction container. This 6 cubic yard unit is equipped with a side load ground feed ANSI hopper.

*Steel Drums*

*Wood Pallets*

## 4 Cubic Yard Pre-Crusher

The Wastequip 4 cubic yard unit offers another alternative for customers with smaller volumes. But don't be fooled, this hardworking durable unit will give you steady payloads and dependable service.

*(Pictured here with Side Feed Access Door)*

*Optional Tongue & Groove Floor*

## Dual Cylinder Pre-Crusher Compactor

High force dual cylinder unit with max force of 141,000 lbs.

# Cart Dumpers & Vertical Balers

## Tilt Truck Style Cart Dumper

Our tilt truck style cart dumper is made to work in cooperation with plastic carts. These dumpers are made to accommodate the entire cart within the box frame. They come in various sizes and can be used in dock level or ground level application.

## Fork Style Cart Dumper

The equally effective fork style cart dumper works with carts that utilize side pockets in order to be dumped. The forks slide inside the pockets of the typically steel containers and are thereby dumped.

## Two-Bar Cart Dumper

Our most economical cart dumper is the integrated two-bar dumper. This unit is typically mated with one of Wastequip's roll-off self contained units and runs off of the same remote power unit. NOTE: 90 gallon is the most common type, but this dumper can be manufactured to work with most size carts.

## Vertical Baler

Wastequip's vertical baler is made to work in areas with limited space for recycling cardboard, paper, or plastic. We offer several models and sizes of vertical balers to service customers' needs.

*\*Model 60 HD WQ Vertical Baler shown here*

## Side Mount Power Pack

Wastequip's technician friendly power pack makes it easy to maintain our equipment.

## Wire Tie Guides

Optional item used to guide baling wire and facilitate front bale tie off.

# Installation and Options

## Model 255 HD WQ Self Contained with Tilt Truck Dumper

Typical installation of self contained compactor working with one yard tilt truck style cart dumper.

*Ground Feed Doghouse with Mechanical Door Lock*

## Wastequip Optional Systems

Wastequip offers numerous steel options, electrical control monitoring options, and hydraulic options. The majority of our compactors come equipped with factory mounted ANSI and OSHA approved steel options which are specific to the individual site and customer. These options range from a simple walk up ground feed hopper to more complex options such as full weather enclosures and automated tenant access options for apartment complexes. Wastequip's ability to personally customize each unit ensures proper and efficient safety practices.

*Model 245HD/WQ with 8 Foot Wide Drive on Deck and Hinged Access Gate with Interlock Switch becomes a Full Weather Enclosure.*

## Self Contained with Integral Cart Dumper

This self contained roll-off is designed to dump customer carts into a rear feed hopper. A manual control lever and dump/pack selector switch operates the fork style dumper and compactor when on site. The forks are then placed in “complete dump” position for transit to and from the landfill.

## Dewatering Compactor

Ball valve drains are added to this self contained unit to remove liquid through a specially designed floor.

*Rear Feed Double Door Doghouse with Plastic Lids*

## Three Sided Hopper

Fed from ground level, this three sided ANSI hopper meets all safety guidelines.

## Mail Box Doghouse

Specifically made for apartment and residential complexes, the aluminum mailbox doghouse allows tenants to dispose of waste with limited supervision by facility management.
